# Seamless smart charging across home and work

Electric Miles is now fully compatible with Peblar EV chargers, giving EV drivers the power to control and smart charge their Peblar chargers through the Electric Miles EV Driver App.

Peblar, a leading EV charger brand from the Netherlands is entering the UK market in early 2026. With this integration, Peblar users get access to intelligent charging, energy savings, and effortless control from the very first day.

This partnership brings together Peblar's high-quality charging hardware and Electric Miles' smart charging platform, creating one smooth charging experience across every location.

## The Problem

Most EV drivers use different charging systems in different places, one app at home, another at work, and sometimes a third at public chargers. This leads to:

- Confusing user experiences
- Manual scheduling
- Lost energy-saving opportunities
- Multiple apps and logins

Drivers want one simple app that works everywhere.

## The Solution: Electric Miles x Peblar

### 1. Control all peblar chargers in one app

- Manage Peblar chargers directly through the Electric Miles EV Driver App
- Consistent experience at home, workplace, or fleet locations
- No switching apps, no confusion

### 2. Smart charging that saves money

- Automatically charge during low-tariff hours
- Optimise charging around solar or renewable energy availability
- Reduce energy bills without lifting a finger

### 3. Remote control & real-time Insights

- Start, pause, or stop charging remotely
- Track charging history, costs, and energy usage

- Make smarter decisions with transparent data

## 4. Built for Installers, businesses & fleets

- Easy setup and fast onboarding
- Works smoothly across shared chargers, workplace points, and enterprise fleets
- Simple management for admins and users

# Why this integration matters

By combining Peblar's reliable hardware with Electric Miles' intelligent software, EV drivers finally get what they've been waiting for:

## A single, easy-to-use smart charging solution

that works everywhere they charge.

This means:

- Less complexity
- Lower energy bills
- Better sustainability choices
- A unified charging journey

For installers and businesses, the integration means:

- Faster deployments
- Fewer support issues
- Smarter energy management
- Future-ready charging infrastructure

## The bottom line

Peblar chargers + Electric Miles smart charging =

A clean, connected, and cost-efficient EV charging experience, at home, at work, and anywhere in between.

# Want your chargers to work seamlessly with Electric Miles?

Become a partner and deliver a smarter charging experience that drivers will love.

👉 Book a demo

Let's power the future of EV charging, smarter, simpler, and truly connected.

## Ready to Electrify Smarter?

We provide everything you need – from certified chargers and top-tier installers to cutting-edge software that reduces energy costs and boosts performance. Book a call with our team to see how Electric Miles can transform your EV charging operations. ✨
