News (<https://electricmiles.com/category/news/>), News (<https://electricmiles.com/category/news-2/>)

We're proud to share that **Electric Miles** has been shortlisted for **two national awards**:

ECN Awards 2025 – Software/App of the Year: About the ECN Awards 2025 – Electrical Contracting News (<https://electricalcontractingnews.com/awards/>)

Transport + Energy Awards – Best Product or New Technology: Awards 2025 – Transport + Energy (<https://transportandenergy.com/awards-2025/>)

These nominations recognise our mission to simplify and strengthen EV charging and energy management across every layer of the ecosystem.

Powering a Smarter EV Future

Electric Miles brings drivers, installers, fleets, OEMs, and grid operators together on one unified platform, solving the pain points that often slow electrification.

- **For Drivers:** Our AI-driven app automates the cheapest and greenest charging through tariff optimisation and solar matching. With **700,000+ smart charging sessions** already completed and users earning up to **£50/month**, we're making flexibility simple and rewarding.
- **For Installers & OEMs:** Our **EVC Wizard (Installer Miles, co-branded with Vestel)** enables guided multi-brand commissioning and real-time diagnostics, achieving an **80% reduction in engineer callouts** and faster "first-time-right" installations. We also have an Installer Partner Program going on in which Installers get 20% off.
- **For Fleets & CPOs:** Our enterprise platform, **emPACT**, delivers predictive maintenance, real-time dashboards, and revenue reporting. A live depot deployment avoided **£64k in CAPEX**, saved **£40.8k in OPEX**, and achieved a **415% five-year ROI**.
- **For the Energy System:** Through **SmartFlex**, we've integrated with **five DSOs**, managing over **1,000 grid events**(400 in Q1 2025 alone), proving that EVs can deliver dependable energy flexibility at scale.

Built, Proven, and Scaled

- **12,000+ chargers** under management
- **15,000+ registered users**
- **3,000+ installers** onboarded

Every part of our platform, Electric Miles App, Installer Miles, emPACT, and SmartFlex works together to reduce cost, improve uptime, and accelerate EV adoption.

Our Vision

At Electric Miles, we believe the EV transition should be simple, reliable, and sustainable for everyone. Every product we build reduces complexity, cuts costs, and accelerates clean transport adoption, helping create a smarter energy future.

What's Next

We'll keep doing what we do best: innovating for the betterment of the EV industry and supporting our partners as they grow.
